

## Development Assessment Services- Crown Development

Holmes Dyer was engaged by Planning and Land Use Services (PlanSA or PLUS) to assess developments undertaken by State Government agencies. This includes development for schools, jetties, health infrastructure, and land division for road reserves among others.

Holmes Dyer was responsible for assessing the applications, but not managing the entire process; in this way maximising the cost-effectiveness of the service by leaving the administrative functions within PLUS.

Holmes Dyer provides a high-quality, affordable and scalable service, with the capacity to take on as many applications as needed at a given time in order to smooth out seasonal variation. This provides PLUS with the flexibility it needs to be able to meet its timeframe obligations in a less resource intensive manner.
